

Torsiontester TG-21

Completely automatic torsiontester TG 21

Technical data:

Torque:	0 - 150	Nm
Torque ranges:	0 -19.99	Nm
	0 -150.0	Nm

Angle measurement by incremental sensor, resolution 0.1°, max. angle 9999.9°

Digital reading of tool distance

All functions are controlled by computer. Software contains a database for more than 10.000 types of springs, more than 200.000 testreports of input/output statistics or machine capability reports

Statistic output on laser printer (option) and TFT color monitor

SPC-Software for process control

Other torque ranges on demand
