

Storage hoppers

Provision of parts for feed systems of bulk goods of all kinds

Storage hoppers with electromagnetic drive

Capacities:

VB-20	Up to 20 litres, max. 10 kg
VB-40	Up to 40 litres, max. 25 kg
VB-80	Up to 80 litres, max. 50 kg

The bulk goods are tipped into the storage container. A control unit adjusts the desired conveying rate by means of an electromagnetic drive system. The storage hopper can be automatically switched on or off by a contents level monitor in the feed system.

Additional equipment:

- Control unit
- Contents level monitors for feed systems
- Base frame for the storage hopper
