

# AGH-1/Z

## AGH 1/Z

### Technical data:

power supply	230 V or 400 V
power consumption	0,7 kW
wire diameter	up to 1 mm
inner diameter of drum or ring	170 - 490 mm
max. height of drum or ring	150 mm
max. load of ring or drum	80 kg
max. speed	100 rpm
diameter of table	600 or 800 mm

On the swift **AGH 1/Z** the wire can be placed horizontal on rings or drums. The swift is especially designed for thin wires and features continuous as well as for intermittent wirefeed. Because of the electronic controlled motor with tension control the swift guarantees low and to the wire diameter adaptable tension forces. Beside this there are no additional radial forces on the wirefeed of the coiler. With these advantages you can reach a high accuracy in wirefeed which improves the quality especially on a critical production. Higher speed in production of springs can be reached because of the high speed of the swift.
