

AGH-2

AGH 2

Technical data:

power supply	230 V or 400 V
power consumption	app. 1,5 KW
wire diameter	app. 0,4 - 1,6 mm
diameter of table	app. 1000 mm
max. weight	350 kg
max. speed	80 rpm
wire accumulator	3,5 m
guiding wheels	240 mm or 500 mm

On the swift **AGH2** the wire can be placed horizontal on rings or drums. The swift is designed for continuous wirefeed as well as for intermittent wirefeed. Because of the electronic controlled motor with tension control the swift guarantees low and to the wire diameter adaptable tension forces. Beside this there are no additional radial forces on the wirefeed of the coiler. With these advantages you can reach a high accuracy in wirefeed which improves the quality especially on a critical production. Higher production speed of springs can be reached because of the high speed of the swift.
