

Tray packing WP-2

Functional description:

The empty honeycomb packing cases are put in manual as pile in the equipment. A gripper takes one empty packing case off the pile and places it on a transport belt. Every comb of the honeycomb packing case is filled with a part. At the end of the transport strip a gripper piles up the filled honeycomb packing cases. Then the filled cases can be taken away manual as a pile.

Dimensions of the feeding device:

Width: 2270 mm
 Depth: 1400 mm
 Height: 1750 mm

Dimension of the honeycomb packing case:

max 600 x 400 mm

Cycle time of feeding:

max. 60 cycles / min.

Height of the piles:

max. 1000 mm
